- 2017** 70 years Gummiwerk KRAIBURG

## Active in Environmental Protection

Ecological responsibility has many facets at KRAIBURG. Since 2014, KRAIBURG has been certified according to the ISO 50001 energy management system. This allows us to develop previously unused energy efficiency potentials, and to reduce energy costs and greenhouse gases (such as CO2 emissions). The energy management system makes an important contribution to protecting the environment.

**Environmental protection is a cornerstone of corporate policy at KRAIBURG.**

This is achieved on the one hand by reducing waste, emissions and the use of resources in production, and on the other hand by preventing toxic or environmentally harmful raw materials already during development of the compounds.

## Future at KRAIBURG

**Respectful and friendly** cooperation strengthens equal and trustworthy relationships to internal as well as external partners. At KRAIBURG this is fully integrated in our corporate culture.

Creativity, dedication and know-how of each individual employee is crucial for the **satisfaction of our customers, and thus, the success of Gummiwerk KRAIBURG.**

KRAIBURG is aware of its **entrepreneurial and social responsibility** to its employees, customers and business partners, as well as to the social environment. Since only **sustainable and economical action is future-oriented.**

## IDEAS AND SOLUTIONS IN RUBBER COMPOUNDING

## Gummiwerk KRAIBURG Products and Services

## Facts and Figures

### Headquarters & production site

Waldkraiburg, Upper Bavaria, Germany

### Production site

Novi Iskar, Bulgaria

### Turnover 2016

95 million €

### Employees

ca. 460

### Products

Rubber- and Silicone Compounds

### Main Fields of Application

Automotive industry, construction industry, electronics, food industry, roller industry (rubber rollers), etc.

### Markets

Europe, North America, Asia

### Partners

KRAIBURG Rubber (Suzhou) Co., Ltd., China  
KRAIBURG Rubber Co, Ltd., Korea

## Fields of Application

KRAIBURG-Compounds are as semi-finished product used in many different end products in various markets.

### Automotive

e.g. turbocharger hose, joint discs, fuel pipes, wind-screen wipers, tank cover sealings, vibration absorbers

*Automotive suppliers, OEMs, system suppliers*

### Industrial

bearings, buffers, membrans, rollers, pump stators, sealings of any kind, electrical connectors, riddle screens, general and specific rubber-metal- and rubber-plastic-compounds, etc.

*Rubber processing industry*

### Rubber Rollers

Conveyor rollers, squeegees, painting rollers, graphical rollers, etc.

*Roller manufacturers*

### Composites

vibration damping, impact protection, improvement of the fracture behavior and acoustic behavior, friction improvement, etc.

*Automotive suppliers, System suppliers, wind power industry*

## Why to choose KRAIBURG

**As leading solution provider we show every day how to get the best out of our compounds.**

### Largest compound portfolio in Europe

currently about 2700 compound recipes

### Outstanding quality

highest process reliability

### Individual solutions

We think together with our customers

### Qualified expertise

through our professional and experienced employees

### Innovative developments

future-oriented and state-of-the-art

**and much more...**
