## Sustainability

Sustainability is firmly established in the business processes at **KRAIBURG**. Our goal is to **continuously reduce the consumption of raw materials through optimization of our processes**. We adhere to this principle also in the design and modernization of buildings and the machine park, as well as in the manufacture of products and their processing by our customers.

**KRAIBURG** is always aware of its entrepreneurial and social responsibility towards its employees, customers and business partners and also towards the social environment. Sustainable action is the only way to prepare the future.

## Future at KRAIBURG

A decisive factor for our success: more than **400 highly qualified and dedicated employees**. Our organizational and management structure offers freedom for independent thinking and actions. Individual knowledge and creativity, the courage to develop unconventional ideas, and many years of practical experience enable well-founded joint decisions.

The individual has always played an important part in our family owned company. Many of our employees have been with us for more than 10, 20 or even 30 years.

That means:  
Our customers benefit from highly motivated, experienced employees who assist them in numerous projects over the course of time.

## About us

We offer our customers the largest diversity of all European compound manufacturers, with about 2800 active compounds at present.

Our goal is the optimal synergy of the compound formulation, raw materials and the requirements of our customers. Whether for injection molding, extrusion or on presses: We create the right compound for every field of application.

In production facilities with an area of more than 10,000 sq. m. we maintain the following capacities:

- five mixer lines (three black, two colored)
- Extruder and strainer technology
- Roller head and calander system
- Fully integrated production process
- Colored and bright compounds

Our management system is certified to the following standards:

- ISO 9001:2015 (quality management system)
- ISO 14001:2015 (environmental management system)
- ISO 50001:2011 (energy management system)

## Fields of Application
